Nightingale Rec Residents
Cambridge

24 July 2020

Dear Resident

Nightingale Recreation Ground Electric Vehicle Charging points

Cambridge City Council has identified the public car park for Nightingale Recreation Ground as being a suitable location to have some electric vehicle charging points installed.

The installation of electric vehicles charging points is part of Cambridge City Council's commitment to reducing air pollution and tackling Climate Change. Cambridge City Council has received funding from the Office for Low Emission Vehicles (OLEV) to provide rapid and fast electric charging points for taxis and Nightingale Recreation Ground is seen as an ideal location due to its vicinity to Addenbrookes Hospital. This scheme is part of wider project by Cambridge City Council, to convert its taxi fleet to ultra-low or zero emission vehicles by 2028 with a total of 21 charge points being installed around Cambridge City and South Cambridgeshire.

At Nightingale Recreation Ground we propose to install 2 electric vehicle charging points that will service 4 bays in total. One of these spaces would be marked for the use of taxis only, with the remaining 3 bays open for general public use. As part of these proposals the rest of the bays in the car park will be marked up so all parking spaces will be clearly designated.

Maps on the following page show the proposed site location and indication of the layout.

We would welcome your views on the above proposals.

Please email the following with your feedback:

egg@cambridge.gov.uk or call 01223 457000 and ask for Jo Dicks

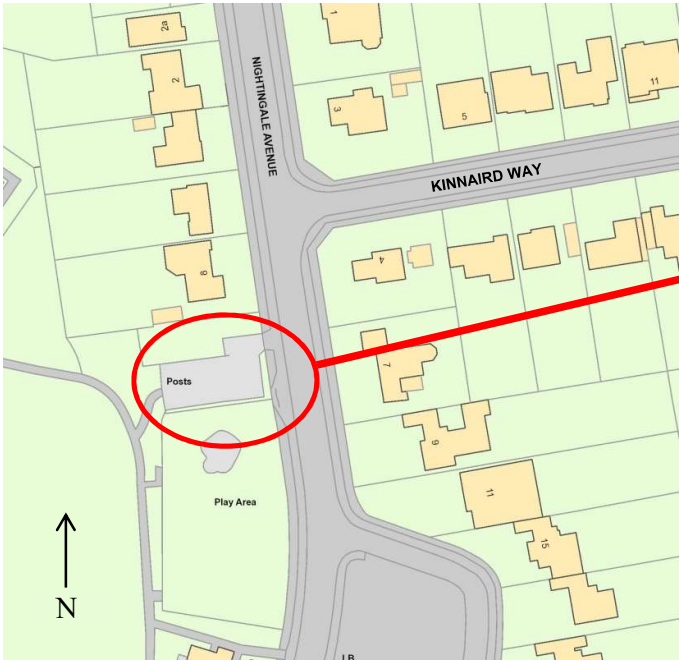

Please can you return your views to us no later than Friday 14th August. We will collate feedback and use this in our planning for the site.

Yours sincerely
